

Insulation paper Electron E Image

Composition

Insulation paper Electron E is a solid cardboard insulator used mainly for its excellent electrical insulation properties. The cardboard consists of a highly flexible vulcanized fiber. Frequently used for electrical insulation.

Application

Electrical winding insulation, wire winding insulation, for motors and transformers.

Maximum operating temperature

Class A 105°C

Insulation paper Electron E characteristics

Model	Thickness (mm)	Width of Roll (mm)	Unit (Roll or kg)
E 0.15	0.15	1000	Roll or kg
E 0.5	0.5
