

Image Carton Leatheroid C

Application

Electrical winding insulation, wire winding insulation, for motors and transformers.

Composition

Insulation paper Leatheroid C is a solid cardboard insulator used mainly for its excellent electrical insulation properties. The cardboard consists of a highly flexible vulcanized fiber. Frequently used for electrical insulation.

Maximum operating temperature

Class A 105°C

Insulation paper Leatheroid C characteristics

Model	Thickness (mm)	Length of Roll (mm)	Unit (Roll or kg)
C 1	0.1	1000	Roll or kg
C 2	0.2		
C 3	0.3
