

Image film CP

Application

Used in the electrical industry in general, especially in the manufacture or repair of motors and low-voltage transformers, has good dielectric and mechanical resistance and good thermal resistance.

Composition

Insulation paper Leatheroid with polyester film CP is a composite foil with a polyester film and fish paper used mainly for its excellent electrical insulation properties. This plasticized cardboard is a vulcanized fiber with a highly flexible polyester film. Frequently used for electrical insulation.

Maximum operating temperature

Classe B 130°C

Breakdown voltage

6.0 kv

Film CP Characteristics

Model	Thickness (mm)	Width of Roll (mm)	Unit (Roll or kg)
CP 0.18N	0.18	1000	Roll or kg
CP 0.28N	0.28
