

Image PVC Sleeving

**Specifications :**

- Class B
- Breakdown voltage 2500 V
- Bending test: No visible cracking or detachment of coating after bending for 96 hours at 130°C or at -25°C.

**Composition :**

PVC sleeving is a PVC-coated fiberglass sheath with excellent dielectric properties, widely used for motor applications

**Application :**

PVC sleeving is used in the electrical industry in general, particularly in the manufacture or repair of motors and low-voltage transformers, with good dielectric strength

**PVC sleeving characteristics**

Model	Diameter (mm)	Packaging	Unit (m)
G1	1	Roll of 100 m	Meter or Roll
G2	2		
G3	3		
G4	4		
G5	5		
G6	6		
G7	7		
G8	8		

## Dimensions Gaine PVC

G10	10	Roll of 50 m	Meter or Roll
G12	12		
G14	14		
G16	16		
G18	18	Roll of 25 m	Meter or Roll
G20	20		
G25	25		
G30	30
