Storability:

This product, like other products in wood pulp, is moisture-sensitive. After removing the original package, we recommend to store the PSP 3052 in dry condition and protecting the product from dust and moisture and not store it on the ground. Protects it from the sun.

Application

Presspahn sheet complies with type B 3.1 according to IEC 60641-3-1. The PSP 3052 suitable for oil's transformer isolation (spacers, cylinders, barriers between phases and centers, disks, rings, screens, bars, etc.) and in all of that electrical equipment that require: very good electric insulation – very good mechanics resistance – good thermal resistance.

Composition

The PRESSPAHN is a pressed cardboard obtained from cellulose sulfate

Maximum operating temperature

Classe A 105°C
